

Proposed Options to Balance the 2025-26 Budget

To: Finance, Budget, and Enrolment Committee

Date: April 30, 2025

Report No.: 05-25-4881

Strategic Directions

- Commit to the implementation of the Truth and Reconciliation Commission of Canada: Calls to Action
- Belong - All students belong, are engaged, and valued in an inclusive environment
- Achieve - All students reach high levels of achievement, success, and personal development
- Thrive - All students graduate with the confidence, skills, and knowledge to thrive
- Revitalize - All students and staff learn and work in inclusive, safe and modern environments

Equity as a guiding principle: Equity is foundational to all TDSB work and will be embedded throughout the strategic directions.

Recommendation

It is recommended that the report regarding the proposed options to balance the 2025-26 budget be received.

Executive Summary

The Board is required to submit a balanced budget to the Ministry of Education (EDU or Ministry) and this report meets the Director of Education's statutory requirement to present a balanced budget to the Board of Trustees.

The Toronto District School Board (TDSB) has a structural deficit, meaning that the Board spends more than it receives in funding. Some reasons for the structural deficit include the underfunding of statutory benefits and the TDSB teacher salary grid, the

Agenda Page 10

inability to close underutilized schools, and the fact that grant revenue has not kept up with the cost of inflation. In addition, the Board does spend more than funded in some areas and provides services in areas that are not funded at all.

As indicated in the report presented at the Special Finance, Budget and Enrolment Committee (FBEC) meeting on February 27, 2025, the projected deficit for 2025-26 was estimated at \$65.9 million. The March 6, 2025 Special Board meeting resolution to add back 28 unfunded Vice Principals that had been removed from the preliminary school-based staffing allocation increased the projected deficit for 2025-26 to \$70.3 million.

On April 1, 2025, the elimination of the federal consumer carbon tax had a \$12.3 million positive impact on the 2025-26 projected budget. This results in an updated projected deficit of \$58.0 million. The Board was implementing the deficit recovery plan submitted to the Ministry on September 30, 2024, which indicated that the Board would have an \$11 million deficit in 2025-26. However, on April 23, 2025 the Minister of Education stated that the TDSB deficit recovery plan had been rejected and that the Ministry will appoint a financial investigator to address TDSB's ongoing deficit. Accordingly, staff are presenting options to reach a balanced budget for 2025-26.

Staff have reviewed the list of unfunded/underfunded/overspent areas to provide options to present a balanced budget. The options have considered guiding factors that include alignment with the Multi-Year Strategic Plan (2024 to 2028), minimizing impact on direct support to students, Ministry regulations (like class size and enveloping requirements), the expectations of the Ministry regarding programs offered outside of our core mandate, and collective agreements. Since over 85% of the Board's operating budget represents salaries and benefits, some recommendations will propose a reduction in staffing. Collective agreements will impact these reductions, including the timing of when certain decisions need to be made.

Trustees have already approved some changes and staff has already implemented some operational efficiencies/changes that will have a positive impact on the budget including, for example:

- Implementing a plan to operate general interest courses at cost recovery
- Reintroducing International Baccalaureate (IB) fees
- Implementing increased permit fees, as approved by the Board of Trustees, to work towards cost recovery

This report provides recommendations for reductions. These include recommendations regarding:

- Pools and swim programming
- Music programming
- 1:1 student devices
- Alignment of class sizes to collective agreements and regulations

- Outdoor Education
- Continuing Education
- A reduction of positions originally funded by eliminated one-time funding
- New Procedures and Improved Support for Employees
- A commitment to nurturing local schools
- A review and reduction of central department budgets

These recommendations will allow staff to present a balanced budget for 2025-26 for trustee consideration and decision making. It is important to note that although these recommendations align with the guidelines related to the budget decision making, some of these recommendations are not consistent with motions passed by the current or previous Boards of Trustees. Accordingly, these recommendations, if accepted, will potentially impact these motions.

Staff will continue to review all areas of TDSB operations to determine additional areas of savings. In addition, the Ministry has not yet released the Core Education Funding (Core Ed). Once released, staff will calculate the actual grant revenue and determine the impact on the financial position.

Further information will be provided at the May 15, 2025 Special FBEC meeting.

Context

Background

Section 231 of the *Education Act* requires school boards to adopt a balanced budget. According to the Ministry, “when preparing and adopting budgets (estimates) for the fiscal year (September 1 to August 31), school boards are required to ensure that estimated expenses do not exceed estimated revenues unless any in-year deficit can be covered by accumulated surplus of a prior year and the in-year deficit is less than 1% of the school board’s operating budget.” 1% of the TDSB operating budget is approximately \$33.3 million and the Board is projected to have an available accumulated surplus of \$26.7 million, including \$10 million of sinking fund interest, on August 31, 2025 (assuming TDSB can use Proceeds of Disposition (POD) to balance 2024-25). As a result, \$26.7 million is the maximum deficit that the Board could have in 2025-26.

However, because of the \$28 million deficit projected for 2024-25 and in order to use POD to balance, the Ministry required TDSB to submit a deficit recovery plan (see below) that requires TDSB to have a balanced budget by 2026-27.

The Director of Education has a statutory requirement to present a balanced budget to the Board of Trustees. This report represents the first steps required to present this budget. Further reductions will be required.

Deficit Recovery Plan

The Board submitted a budget to the Ministry in 2024-25 that requested to use \$28 million of POD in order balance. POD represents the revenue received from selling property and is required by Regulation to be used to address School Condition Improvement (SCI). Boards must ask permission to use POD for other purposes and POD is not a sustainable funding source for operating expenditures. As part of the approval, the Ministry can provide additional requirements and the request to use POD for the 2024-25 budget had several conditions including commitments related to future budgets:

- A commitment to full cost recovery on non-Kindergarten to Grade 12 programs
- A commitment to make staffing adjustments when one-time funding has ended

In addition, the Board had to submit a 2-year deficit recovery plan which was presented to the Special FBEC meeting on August 26, 2024 and submitted to the Ministry on September 30, 2024. The deficit recovery plan for 2025-26 included \$5 million of central savings, \$1 million of IB fees and \$11 million in savings related to the phasing in of the employee future benefit liability. This left a deficit of \$11 million for 2025-26 that would require the use of POD to balance. The remainder of the phase in of the employee future benefit liability will provide the \$11 million saving required in 2026-27.

On April 23, 2025, the Minister stated that the Ministry had rejected the deficit recovery plan. As a result, staff are operating with the understanding that there is an expectation that TDSB will be required to submit a balanced budget for 2025-26.

Auditor General Performance Audit Recommendation

The Auditor General's 2024 Annual Report, released in December 2024, included a Performance Audit of TDSB. One recommendation stated "We recommend that the TDSB and the Ministry of Education work together to understand whether the TDSB has a structural funding deficit and how the TDSB's unique circumstances play a role in its financial challenges."

Both the Board and the Ministry identified areas of concern with regard to the structural deficit and committed to working together. TDSB staff has reached out to EDU staff and one meeting has already happened with the intention of continuing to meet.

Structural Deficit

The TDSB has a structural deficit. This means that the Board spends more than it receives in funding on an annual basis. There are a number of items contributing to the structural deficit – some that are within the control of the TDSB and some that are not.

The main items that are not within the control of TDSB and the Ministry does not provide sufficient funding for include:

- *Unfunded Statutory Benefits*

Canada Pension Plan (CPP) has been gradually increasing from 4.95% in 2019 to 5.95% in 2023. In 2024, a second additional contribution rate was added. There has not been a corresponding increase in funding to offset these costs and in 2024-25, the annual underfunding of CPP has increased to \$39.0 million for TDSB. Employment Insurance (EI) has also been increasing and the underfunded amount is \$4.7 million. The total unfunded statutory benefits are \$43.7 million.
- *Difference in Funding for Teacher Salaries vs. Actual Salary Cost*

In 2014, the Province began Central Bargaining and came up with a central salary grid for teachers. Funding for teachers is based on this central grid. At that time, the TDSB grid was higher than the Provincial grid resulting in an unfunded amount for each teacher. This amount continues to increase as the Province bargains percentage increases each year. In 2024-25, the amount that is underfunded is projected to be \$26.1 million.
- *Difference in Funding for Designated Early Childhood Educator (DECE) Salaries vs. Actual Salary Cost*

DECEs were introduced in school boards across Ontario when Full Day Kindergarten was implemented in 2010. A benchmark was established for the grants at that time. TDSB already had an established job classification for DECE and therefore, already had a salary grid. This grid was higher than the benchmark funding. This amount continues to increase as the Province bargains percentage increases each year. In 2024-25, the amount that is underfunded is projected to be \$1.5 million.
- *Cost of Operating Under-Utilized Schools due to School Closure Moratorium*

Prior to 2015, the Ministry provided a grant called “Top-up funding under the School Facilities Operation and Renewal grant”. The Ministry stated that “This funding is provided for eligible schools to support the operation and maintenance of facilities where enrolment is less than capacity.” In other words, the Ministry recognized that there is a similar cost to operating a school with full capacity as a

school that is underutilized. In 2015, the Ministry announced the phase out of this grant over three years. In the announcement, the Ministry stated “One effect of this funding has been to sustain schools in areas where it would make more sense from a program, fiscal, demographic and geographic perspective to rationalize school space through measures that might include closure or consolidation with nearby facilities and partnerships with coterminous school boards.” In other words, the Ministry encouraged Boards to close schools to deal with the excess capacity. The challenge is that, in June 2017, the Ministry announced a moratorium on school closures; thereby eliminating the ability of TDSB to develop and implement plans to maximize capacity while also reducing the funding received to assist with the operating these schools. The TDSB received \$35.5 million top up funding prior to the phasing out of this grant. Staff have estimated that the grant would be \$43.1 million in 2024-25 if the funding had continued.

- *Grant Revenue Not Keeping Pace with Inflation*

There have been multiple reports completed by third parties which show that grant revenue has not kept pace with inflation. There are different reports that estimate the gap between \$776 and \$1,500 per student. In the “Ontario Public School Board’s Association (OPSBA) Submission Regarding the 2025-2026 Core Education Funding and the Ministry of Education Funding Engagement Guide” on November 12, 2024, OPSBA indicated that “Adjusted for inflation, per pupil funding now stands at \$11,506.03, creating a gap of \$776.41 per student—marking the lowest level of funding in over a decade.” For TDSB a gap of \$776.41 per student equates to a funding gap of approximately \$184.5 million.

On March 27, 2025, staff presented a report to FBEC that included a list of unfunded/underfunded/overspent items that TDSB has some control over that also contribute to the structural deficit. It is these areas that staff are reviewing to bring forward a budget that meets the expectations of the Ministry.

Updated Financial Position

At the Special FBEC meeting on February 27, 2025, staff presented a report that indicated that the projected deficit for 2025-26 was estimated at \$65.9 million. With the decision by Trustees at the March 6, 2025 Special Board meeting to add back 28.0 unfunded Vice Principals that had been removed from the preliminary school based staffing allocation, the updated projected deficit for 2025-26 increased to \$70.3 million.

Since that time, it has been confirmed that the elimination of the federal consumer carbon tax will have a positive impact on TDSB in 2025-26 equalling \$12.3 million. This means that the updated projected deficit is \$58.0 million.

Guiding Factors to Consider When Proposing Options to Balance

In order to balance the budget, the Board has to decrease spending by \$58 million. Staff have considered a number of guiding factors when proposing options to balance:

- The Multi-Year Strategic Plan (2024-2028) (MYSP) - The MYSP will help to determine where it is important to allocate resources to support the plan.
- Ministry regulations - including class size regulations and other spending requirements
- Collective agreement provisions – including timelines and protected complements
- Direct impact on TDSB students
- Commitments as part of request to use POD to balance the 2024-25 budget
- Auditor General of Ontario recommendations

Balancing the 2025-26 Budget

Staff have reviewed the list of unfunded/underfunded/overspent items and are providing options to achieve a balanced budget.

The Board has approved some changes and staff has already implemented some operational changes that will have a positive impact on the budget including:

- Implementing a plan to operate general interest courses at cost recovery
- Reintroducing IB Fees
- Implementing increased permit fees as approved by the Board of Trustees to work towards cost recovery

These efficiencies help make up the \$5 million of operating savings committed to by TDSB as part of the deficit recovery plan and the \$1 million increase in revenue projected for IB fees.

In addition, staff are proposing the following options:

Pools and Swim Programming

TDSB has sixty-six swimming pools that it operates and maintains. For use during after-school hours, twenty-seven pools are leased to the City of Toronto, two pools are leased privately, and thirty-seven pools are permitted out by TDSB. There is no funding provided to school boards for the operation of pools and a jurisdictional scan indicates that there are no Greater Toronto Area (GTA) school boards that operate pools for their own use. In Ontario, pools are maintained and operated by Municipalities. In addition, the jurisdictional scan indicated that GTA boards use the Ministry-funded “Swim to Survive” program to provide swim programming to students. This program is offered by

City staff. The Ministry has indicated that the operation of pools would be outside a school board's "core mandate" and the expectation would be that pools are operated on a cost recovery basis.

Appendix A outlines the recommendations related to pools to be able to operate on a cost recovery basis. The main recommendations include:

- Provide programming through "Swim to Survive"
- Renegotiate lease with City of Toronto to be cost recovery
- Look for opportunities for other cost recovery leases
- Close pools that are not leased

As a result of these recommendations, the Board would no longer use aquatic instructors to provide programming.

Appendix A provides more information on the recommendations to achieve annual operating savings of \$12.8 million plus a significant reduction in renewal costs.

Renewed Music Programming

Currently, there are seventy-four Itinerant Music Instructors (IMIs) employed at TDSB at an annual cost of approximately \$5.0 million. In the 2024-2025 school year, IMIs provide direct support to Kindergarten to Grade 8 students through 434 IMI programs in 277 schools. 192 elementary schools do not have IMI programs. IMIs are non-Ontario Certified Teachers who provide instruction to elementary students using musical instruments as well as vocal music.

There are a number of challenges related to the current use of IMIs including the fact that there is no funding to support IMIs and there is not equitable access across the system. A renewed plan for music programming is provided in Appendix B and will result in savings of \$4.0 million in 2025-26.

1:1 Devices

TDSB provides access to 1:1 devices to students across the district in Grades 5-12 at a cost of approximately \$9 million annually. Students currently have the opportunity to receive a new Chromebook in Grades 5 and 9.

Staff is proposing a change in the program by starting in Grade 7 versus Grade 5 and students would keep the device for the full 6 years. This would decrease the annual cost by approximately \$4.5 million. Further details are provided in Appendix C.

Outdoor Education

TDSB operates 9 outdoor education facilities – 4 day centres and 5 overnight centres. The Board receives funding for outdoor education from Core Ed and the Ministry does

recognize that there are other revenue sources for outdoor education, such as program fees, donations and rental fees. The amount that TDSB spends on outdoor education is \$4.7 million more than it receives in revenue through Core Ed Funding and other sources. Staff are committed to providing outdoor education on a cost recovery basis and will do a further review to determine how to achieve this.

Continuing Education

The Continuing Education department offers programs that include International Languages Elementary/African Heritage, Community Programs, secondary credit courses (i.e., night, summer, weekend), summer programs, international adult education, Adult English as a Second Language courses, and Adult Day School credit programs. Currently, Continuing Education is operating at a deficit of approximately \$4.7 million (an improvement of \$2.2 million from the prior year). Most school boards across Ontario operate Continuing Education at break even or in a surplus to help support other areas of the budget.

Staff continue to look for operating efficiencies and ways to increase revenue by increasing participation and in some cases, fees. The projected budget impact for 2025-26 is \$2.3 million and details are provided in Appendix D.

Alignment of Class Sizes to Collective Agreements and Regulations

In past years, TDSB has had smaller average class sizes than required by regulations. For example, the average Grade 4-8 class size for TDSB in 2024-25 is 24.1 while the regulation is 24.5. This difference alone equates to approximately 68.0 additional teachers. During the 2025-26 reorganization, staff will ensure that TDSB class sizes align as best as possible with Ministry regulations. The expected budget impact will be approximately \$7.5 million.

Reduction of Positions Originally Funded by Eliminated One-Time Funding

The Ministry has shared its expectation that when one-time funding is eliminated, the corresponding staffing should also be adjusted. In 2021-22 and 2022-23, school boards across Ontario received one-time funding to support learning recovery as a result of COVID. For TDSB, this equated to approximately 522.0 positions. In 2023-24, the TDSB budget did make adjustments for 429.0 of these positions. However, 93.0 positions totalling approximately \$10.3 million were maintained. As a result, if adjustments in staffing was made in 2025-26 for these positions, there would be a budget impact of \$10.3 million.

New Procedures and Improved Support for Employees

In the last year, a number of changes have been made to support staff and managers. This has also led to a positive budget impact. The transformation of People and Culture

Agenda Page 18

to better support staff wellness and improve the investigation function, the creation of an Attendance Support Program, the development and implementation of the new “Employee Interim Measures Pending Investigation” procedure are but a few examples. To sustain this progress, an investment of additional resources is required that will lead to additional budget savings. The estimate of the net savings for 2025-26 is approximately \$5 million more than initially budgeted.

Commitment to Nurturing Local Schools

Alternative schools and other specialized programming are necessary for some TDSB students to Thrive (as per MYSP 2024-2028). Staff are aware that there are improvements that can be made to support students in their local schools that will allow students to attend their local school and actually have better access to programming and supports. In the past number of years, the budget has had to supplement staffing in some of our smaller schools, and in particular alternative schools, in order to ensure students have access to necessary programming. By ensuring that local schools provide a supportive environment that meets the needs of students, it is possible to reduce this supplement. The projected savings for 2025-26 is \$600,000.

Central Budgets

All central departments will be reviewing their budgets to identify potential savings. Examples include reviewing all licences, paper usage, technology purchases, and subscriptions. It is not anticipated that this would lead to a reduction in staffing. The target for these savings is approximately \$7.5 million.

Total Options to Balance

The total of the above options is \$59.2 million. See Appendix E for details.

Next Steps

The Ministry has not yet released the Core Education Funding (Core Ed). The current financial position uses an estimate of Core Ed based on no significant changes to the funding. Once the actual Core Ed is received, staff will calculate the actual grant revenue to determine any changes required to the estimate.

Staff will continue to look for additional efficiencies and review all other potential areas. Staff will use the results of the budget survey to ensure alignment between the results and what is being proposed.

There are a number of reviews that are on-going that may have a budget impact in the future. These include the French Program review, the Model Schools review, the Secondary Alternative Schools review and the Modern Workspaces project. In addition,

staff will be reviewing contracts, modernizing processes and looking for efficiencies in all operational areas.

Action Plan and Associated Timeline

Staff will use the feedback from Trustees, the public and students to bring back a budget for approval on June 4, 2025 in order to submit a balanced budget by the June 30, 2025 deadline.

The fact that over 85% of the Board's operating budget relates to salaries and benefits means that some reductions will be impacted by collective agreements. There are collective agreement timelines associated with reducing staff and when the Board misses these timelines, it prevents the Board from considering all options to achieve a balanced budget. Therefore, some reductions will need to be made before June 4, 2025 to meet these timelines.

Resource Implications

Section 231 of the *Education Act* requires school boards to pass a balanced operating budget each year. Budgets are intended to align both human and financial resources to system priorities.

Communications Considerations

It is important to continue to update stakeholders about the budget process and the impacts of the decisions that will be proposed to balance the budget.

Staff will work together to ensure all relevant information is provided to stakeholders.

Appendix A – Pools and Swim Programming

The Toronto District School Board (TDSB) is committed to providing diverse and enriching opportunities for student learning, well-being, and extracurricular engagement. Swimming is part of this engagement.

TDSB Pools

TDSB has sixty-six pools in its schools. Sub Appendix A shows where these pools are located across the city. The pools are in two congregated elementary schools, twenty-five other elementary schools and thirty-nine secondary schools. The school names by learning centre are provided in Sub Appendix B.

All sixty-six pools are owned and operated by TDSB. Currently, for use outside of the school day, twenty-seven of the pools are leased to the City of Toronto, two are leased to private third parties and thirty-seven are currently permitted by TDSB. This information is also included in Sub Appendix B.

Jurisdictional Scan

Staff has done a jurisdictional scan of surrounding Greater Toronto Area (GTA) and other larger boards regarding pool ownership and swim programming. The results are included in Sub Appendix C.

The scan indicates that these Boards have very few pools and that if they do have any, the pools are operated and staffed by the municipalities in which they operate.

Funding

The Ministry of Education (Ministry) does not provide funding to support the maintaining and operating of pools. Across the province, pools are owned and operated by municipalities.

TDSB receives revenue from lease agreements and permit fees for use after hours, although the costs are higher than the revenue collected. In 2024-25, lease revenue is projected to be \$6.1 million and permit fees are projected to be \$3.5 million.

The operation of pools would be something that the Ministry would consider outside of the “core mandate” of school boards and therefore, there is an expectation that the operation of pools would be on a cost recovery basis.

Operating Costs

There are many costs associated with operating pools including:

- Water treatment
- Utilities
- Additional caretaking for cleaning and for after hour usage
- General maintenance

The financial cost of operating the sixty-six pools during the 2024-25 school year is projected to be \$17.2 million as detailed in Sub Appendix D.

Renewal Costs

Ensuring pools meet health and safety standards requires ongoing investments in equipment and facility repairs and there are significant renewal/capital costs associated with keeping pools operational. TDSB is responsible for all these costs for its permitted pools as well as its leased pools even though the Ministry does not provide funding for these costs. In the last 10 years, TDSB has spent \$27.6 million in pool renewal. This year, TLC engaged an external consultant to perform audits of all pools and the renewal needs total approximately \$126.9 million.

Aquatic Instructor Costs

TDSB employs 86.0 FTE aquatic instructors at a cost of \$5.7 million annually. The instructors support programming during the school day at the sixty-six pools across the city. The leasees provide their own lifeguards when they are using TDSB pools after hours and the Swim to Survive program is provided by the City of Toronto aquatic instructors.

Currently, elementary schools require two aquatic instructors at a time to support programming and secondary schools require one aquatic instructor. To comply with Ontario Provincial Pools Regulation 565, the Ontario Physical and Health Education Association (OPHEA) and the Lifesaving Society, secondary schools will require two aquatic instructors starting in 2025-26. The Ontario Teachers Aquatic Standard (OTAS) for secondary teachers is no longer valid as a lifeguarding certificate and the regulation states that two individuals holding lifeguarding certification must be present on the deck. Therefore, 39.0 additional aquatic instructors would be required in 2025-26 to maintain the same level of programming at a cost of approximately \$2.8 million. This would increase the cost of aquatic instructors to \$8.5 million.

Per the jurisdictional scan, TDSB is the only school board that employs aquatic instructors. In addition, upon review of wages paid to lifeguards/aquatic instructors across the City of Toronto, the wages range between \$17/hour and \$22.94/hour. TDSB pays its aquatic instructors between \$28.37 and \$29.79 per hour.

Programming at TDSB Schools

This section highlights the differences in access to programming at TDSB schools across the district, depending on whether the school has a pool.

In elementary schools that have pools, some students have regularly scheduled pool time as part of their physical education programming and some schools schedule regular access to pools for students not part of regular programming. In addition, some schools have swim teams as extra-curricular activities that extend beyond the regular swimming season.

In elementary schools that do not have pools, some schools access City of Toronto pools for the Swim to Survive program (see below). They also may access these pools to have swim team practices during the swimming season.

In secondary schools that have pools, swimming may be a unit in a physical education course, or it may be a specific course. They may also have swim teams as extra-curricular activities that extend beyond the regular swimming season.

In secondary schools that do not have pools, some schools access City or TDSB pools for extra-curricular activities. They also may access these pools to have swim team practices during the swimming season.

Swim to Survive

Swim to Survive is a program developed by the Lifesaving Society that teaches the essentials needed to survive an unexpected fall into deep water. It is an important first step to being safe around water.

The Lifesaving Society aims to have every Grade 3 student in Ontario achieve the Swim to Survive standard. The Society has school grant program to make this happen. At TDSB, this is a pre-existing program and has successfully expanded at schools that do not have pools within the last few years. There are 142 schools registering and 5,527 students participating in the program this year. In the 2023-2024 school year, this initiative engaged over 2,942 Grade 4 students across 85 schools.

The program utilizes City of Toronto pools and staff, and as indicated, is fully funded through the Ministry of Education, including transportation, pool time and instruction.

Access to Pools

There are two main reasons why a programming at a TDSB school may not happen at the sixty-six schools that have pools:

1. Absenteeism

To date, the average absenteeism per aquatic instructor at TDSB in 2024-25 is 16 days. Swimming cannot happen when the instructor is not present.

2. Maintenance

Sometimes, pools are taken offline for maintenance. This can be for a short period of time or, if the renewal needs are significant, a long period of time.

In 2024-25, there are thirty pools scheduled to be taken offline for some period of time:

30 Pools Scheduled for Work Shutdowns	
Number of Pools Closed for One Week to Two Weeks	3
Number of Pools Closed for 1 month	22
Number of Pools Closed for 2 months	2
Number of Pools Closed for 5 months	1
Number of Pools Closed for More than 10 months	2

Recommendations and Next Steps

Given the challenges identified above, including:

- No funding for school boards to operate pools,
- Challenges with renewal costs associated with aging TDSB pools, and
- Equity of access to pools and programming across TDSB

The recommendations to address the challenges are as follows:

1. Expand the Swim to Survive program to all Grade 4 students

Swim to Survive is fully funded, including the cost of transportation to the pool, the pool rental and the instructors. Expanding the program to all Grade 4 students provides equity of access to all schools at TDSB, regardless of whether there is a pool in the school.

2. Negotiate with the City of Toronto

TDSB has twenty-seven pools that are currently leased by the City of Toronto. The lease for these pools expires in the current year and TDSB, assisted by TLC, must negotiate with the City of Toronto to ensure that pools are being operated on a cost recovery basis. It is also an opportunity to assist in expanding the Swim to Survive program.

3. Explore any other opportunities to operate pools on a cost recovery basis

Currently, TDSB leases two pools to third parties after hours. It is possible to explore these types of opportunities, as long as the leases are on a cost recovery basis.

4. Close pools that are not leased

TDSB does not have funding to continue to operate pools that are not leased by the City or a third party on a cost recovery basis. At this time, this would mean the closing of thirty-five pools across the City.

5. Other programming considerations

To ensure equity of access to programming and ensure that pools are being operated on a cost recovery basis, all schools would participate in Swim to Survive. In addition, swim teams would operate during the swim season in the same way across the Board.

This would result in the reduction of aquatic instructors in schools, even if the pools remain open, as there is no funding to provide swimming instruction to students in the Core Education Funding and Swim to Survive will continue to be offered by City of Toronto staff.

Resource Implications

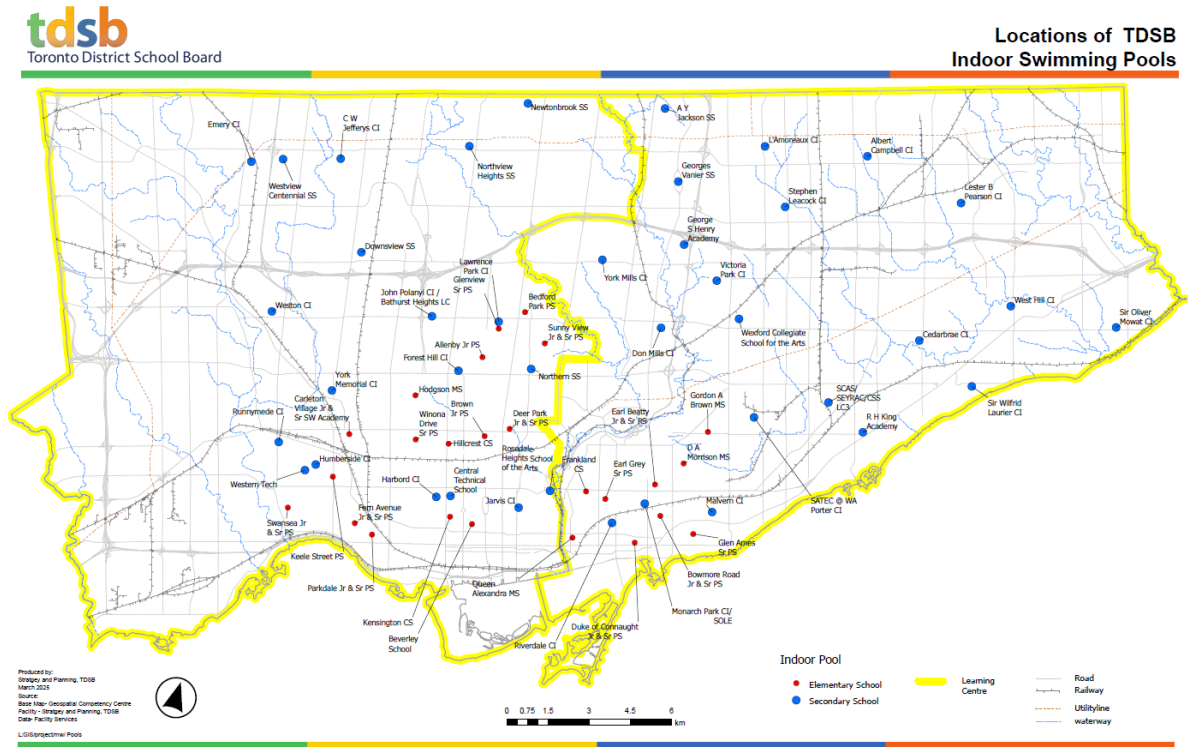

Once this plan is implemented, the impact on the budget will be a savings of \$12.8 million. See details in Sub Appendix E.

Sub Appendix C: Jurisdictional Scan

School Board	Number of Schools with Pools	Arrangement	Programming	
			Elementary	Secondary
Toronto Catholic District School Board	2	Used by the 2 schools for programming and special education programming	Swim to Survive provided by City of Toronto	
Halton District School Board	3	In buildings with Community Centres with no reciprocal agreement	Swim to Survive provided by Halton municipalities	Facilitated opportunities for the Board's Community Pathway Program
Peel District School Board	2		Swim to Survive provided by Peel municipalities	
York Region District School Board	0	N/A (had one and sold to City in 2017)	Swim to Survive provided by York Region municipalities	
Durham District School Board	1	Pool run by municipality and school board can permit	Swim to Survive provided by Durham municipalities	
Hamilton Wentworth District School Board	0	N/A	Swim to Survive provided by City of Hamilton	

NOTE: Swim team practices for all Boards are held at community pools during the swim season for both panels, if the schools have teams.

**Toronto District School Board
Projected Pool Operating Costs
2024-25**

Sub Appendix D: Operating Costs

Daily Operating Costs	7,100,000	1
Maintenance Costs	2,000,000	
Utilities	8,100,000	2
	<u>17,200,000</u>	

1 Includes caretaking, water treatment supplies and other supplies.

2 Most pools are not separately metered. This is approximate cost based on experience and usage.

**Toronto District School Board
Projected Budget Impact**

Sub Appendix E: Projected Budget Impact

Reduction in Costs

Aquatic Instructors

5,700,000

Operating Costs for Closing Pools

9,100,000 1

14,800,000

Loss in Revenue for Closed Pool Permits

- 3,500,000

Cost Recovery for Pools Remaining Open

1,500,000 2

12,800,000

1 The estimated operating costs for the sixty-six pools is \$17.2 million. Therefore, the assumption made is that each pools operating cost is approximately \$260,600 and the current number of pools that would close is thirty-seven.

2 This represents the difference between the operating costs of the 29 pools that are leased and the current lease revenue.

Appendix B – Music Programming Proposal

This appendix outlines a renewed delivery model of music programming for elementary students that enhances equitable access to music instruction and a recommendation for the elimination of Itinerant Music Instructor (IMI) positions across the city.

There are currently 74 IMIs employed at the TDSB at an annual cost of approximately \$5.0 million. In the 2024-2025 school year, IMIs provide direct support to Kindergarten to Grade 8 students through 434 IMI programs in 277 schools identified in Sub Appendix A. 192 elementary schools have no IMIs. Itinerant Music Instructors are not Ontario-certified teachers.

This report outlines:

- some challenges encountered with the current delivery model through the IMI Program;
- the distribution of schools by Learning Opportunity Index (LOI) receiving IMI support at the TDSB; the costs associated with the IMI program (see Sub Appendix B); and a renewed music program that enhances equitable access for students;
- key actions, strategies, and next steps to support the delivery of cost-effective and equitable music programs at the TDSB (see Table 2).

Context

Highlighted throughout this Appendix, are key priorities of the TDSB and the Ministry of Education (Ministry), including high levels of achievement, success, and personal development; promoting inclusive learning environments where all students belong, and are engaged and valued; and achieving a balanced budget.

For the purposes of this report, it is important to note the following:

- IMI programming is not equitably distributed among schools
- the Ministry does not fund the TDSB IMI program;
- while Ministry funding allocations to the TDSB have generally increased, those increases have not been proportionate to increasing expenditures;
- IMIs do not work independently with students. They work collaboratively with Ontario College of Teachers (OCT) certified teachers to provide enhanced programming and support students in Kindergarten to Grade 8;
- IMIs provide instruction to elementary students using musical instruments as well as vocal music; and
- Without IMIs, the TDSB has a robust music program.

Successes and Challenges

The Central Arts Department's commitment to offering professional learning opportunities that honour Indigenous perspectives and centre students' lived experiences through culturally responsive and relevant approaches is unwavering.

Efforts to work towards equity of access, engaging music programs, and fiscal responsibility are ongoing, demonstrating our dedication to continuous improvement. There are several challenges with the current program delivery through the IMI Program model. They include, but are not limited to:

- The IMI Program is currently not available in 192 TDSB elementary schools, which raises significant concerns about equity of access. The TDSB continues to evaluate access to musical instruments across the district to maximize opportunities for students to benefit from learning experiences in music.
- The IMI Program is unique to the TDSB and is not offered across other Ontario school boards. While its original intent was to provide students with enrichment opportunities in music and music training for teachers, planning was not undertaken to support the long-term sustainability of this program.

Educators have benefitted from sustained partnership with IMIs through time, enabling increased classroom teacher knowledge. This has helped to prepare educators for instructional leadership within a renewed music program model.

Renewed Music Programming

Renewed music programming grounded in the TDSB's core commitments will be implemented effective September, 2025. Increased Professional Learning offerings by the Central Arts Department in 2024-2025 have already started the process of helping educators develop the foundational skills needed to facilitate student-centred music programming.

Year 1 (2025-2026) of the Renewed Music Programming model will include:

- an investment of \$1M (educator training, instrument purchase);
- updating the inventory of musical instruments in TDSB schools;
- selecting 50 schools using individual school's musical inventory and LOI for focused training; and
- gathering feedback from students about their interests and the selection of instruments.

Additionally, each school will be expected to:

- complete a report indicating how the allocated funds will be used to enhance student access to musical instruments; and
- outline a Professional Learning Plan indicating how educators will be supported in optimally using their school's inventory of musical instruments.

With the Renewed Music Programming model, TDSB students will continue to receive music instruction from either their regular classroom teachers, non-specialist teachers of music or specialist teachers of music. In Ontario, all elementary teachers can teach music. This is the practice in boards across the province. TDSB is the only board that has an IMI position. TDSB students will continue to receive music instruction from classroom teachers, including those with

and without Music AQs. Additionally, there are 636 elementary TDSB teachers with music qualifications. The Renewed Music Programming model creates opportunities for teachers qualified in music to leverage and share their expertise by modelling strong instructional programs in music. Further details are outlined in the implementation timeline below.

Monitoring

From September 2024 to April 2025, the Central Arts Department has offered a range of Professional Learning (PL) opportunities to enhance educator capacity to facilitate effective music programs. These are in anticipation of implementing the Renewed Music Programming model. Moving forward, there will be a renewed focus on PL which centres succession planning in terms of building educator capacity to facilitate sustainable and engaging music programs. This renewed vision for music programming will support selected schools with acquiring musical instruments and accessing PL to facilitate equity of access to strong music programming. Increased access to PL will be offered centrally through the Central Arts Department. The impact of these supports will be monitored from the student, educator, and administrator perspectives.

Outcomes

The TDSB is committed to providing students with access to strong instructional music programs. This commitment is grounded in equity as a guiding principle, ensuring that all students have opportunities to participate and excel in our music program. Key Performance Indicators will be reported to the Board of Trustees through reports on the Multi-Year Strategic Plan. Indicators will include and are not limited to the number of schools involved in the Renewed Music Program, their profiles, the number of partnerships focused on music instruction, the number of professional learning sessions for educators, educator response to the professional learning sessions, and the number of staff with additional qualifications in music instruction.

Resource Implications

Table 1. Funding for Itinerant Music Instructors

Project and Staffing	Source of Funding
Staffing of Itinerant Music Instructors	- As there is no Ministry funding to support the IMI Program, IMIs are fully funded by the TDSB. - All managerial and support staff attached to IMIs, are also fully funded by the TDSB. - The cost of the IMI program is approximately \$5M.

Next Steps

Table 2. Timeline of Key Actions

Timelines	Next Steps/Actions
Apr. 2025 - Aug. 2026 and ongoing	Expand collaborative efforts by the Partnerships Office and Central Arts Department to increase the number of organizations available to support music programming in TDSB schools. Currently, 66 organizations have music-based educational partnerships with the TDSB.
Apr, 2025 - Jun, 2026	The TDSB Central Arts Department will prioritize expanding its Professional Learning offerings for teachers of music.
Apr. - Jun. 2025	- Monitor the co-planning and co-delivery of Music classes to build classroom teachers' knowledge of music curriculum and delivery. - Create an Instructional Guide for Steel Pan Instruction.
Jun. 2025	Select schools for the Renewed Music Programming model.
Sep. 2025 - Jun. 2026	- Leverage the expertise of the 636 elementary teachers with Music AQs. - Develop course outlines and facilitate Additional Qualification (AQ) courses in instrumental and vocal music. - Where possible, use student success funds to support steel pan instruction. - Invest (\$1M) to provide one year transition support including partially or fully-subsidized Music AQs to TDSB teachers, provide some schools with funding to purchase musical instruments, provide enhanced PL in Music. - Create opportunities for TDSB Schools to share best practices. - TDSB administrators, the Central Arts Department, and the Research and Development Department closely monitor for success using the following Key Performance indicators: - students attending schools in high-priority neighbourhoods experience equity of opportunity to culturally responsive, relevant, and engaging Music programs - increased student engagement in music - increased student achievement in music on the Provincial Report Card (elementary and secondary)

Communication

Beginning in May 2025, through TDSB Connects, system communications to staff, and school newsletters, the TDSB Renewed Music Programming initiative, including plans to increase Professional Learning offerings to teachers of music, will be shared broadly with all TDSB stakeholders.

Sub Appendix B.2 – TDSB IMI Schools by LOI 2024-2025, Cost Analysis and Rationale for Renewed Music Programmoing

- TDSB Schools Receiving IMI Support for 2024-2025 by LOI; and
- Annual Cost Analysis

Table 3:

Breakdown of TDSB Schools Receiving IMI Support by LOI, 2024-2025

LOI	Number of Schools
1-50	38
51-100	32
101 - 150	29
151 - 200	32
201 - 250	29
251 - 300	28
301 - 350	25
351 - 400	26
401 - 468	38
Total Number of Schools	277

Key Observations:

- IMI placements indicate that IMI programs are located at 38 of the highest LOI schools and 38 of the lowest LOI schools.
- Placement of IMIs has not prioritized schools with the highest populations of students who have been historically and contemporarily underserved.
- 192 TDSB elementary schools do not have access to the IMI Program.
- The IMI Program services only elementary schools.

Table 4:

Annual Financial Cost of the IMI Program

Cost Classification	Cost Group	2023-2024 Expenditures
Compensation Expenses	Benefits	\$1,051,152
	Salaries and Wages	\$3,887,843
Compensation Expenses Total		\$4,938,995
Operational Expenses Total		\$37,243
Grand Total		\$4,976,237
Instructional Hours Including Travelling Time		43,222 hours

The approximate annual cost of the IMI Program to the TDSB is approximately \$5M (99% of costs represent salaries, wages, and benefits).

Programs - Enrichment and Staff Development

The IMI Program offers two program types - Enrichment and Staff Development. Through the Enrichment group of programs, IMIs offer instruction in band, steel pan, and strings, and serve students in Grades 5-8. Through the Staff Development group of programs, IMIs offer instruction in vocal music, learning to play the recorder, and learning to play Orff instruments. Staff Development programs support students from Kindergarten - Grade 6.

Staffing

IMIs work alongside Ontario College of Teachers (OCT) certified teachers to supplement regular music programs that are offered in TDSB elementary schools. There are currently 62 permanent IMIs who participate in the staffing process and an additional 12 IMIs in a strictly supply role. Many IMIs are part-time. They are paid by program hours

rather than salary. (Program hours consider the timetable, the distance between locations, and seniority, etc). Program Supply IMIs support schools where another IMI is away for a prolonged absence. IMIs are required to work a minimum of 15 hours/week to qualify for benefits.

Rationale for the Renewed Music Programming Program - Effective June, 2025

- IMIs and their associated costs are not funded by the Ministry of Education. Staffing and other costs for IMIs have become financially unsustainable for the TDSB.
- IMIs are a supplemental resource. The IMI Program is currently being used to enhance learning.
- An OCT-certified teacher must be present in the classroom alongside the IMI.
- The supports provided by IMIs could be provided by classroom teachers who have had adequate levels of Professional Learning in the Arts. The Central Arts Department plans to use some of the savings realized with the Renewed IMI Program to increase Professional Learning offerings for teachers in the Arts with a focus on engaging music programming.
- Savings realized by transitioning the IMI Program to the Renewed Music Programming model would also be used to bring the distribution of musical instruments across the district in closer alignment with the TDSB's equity commitments.
- IMIs are itinerant and not school-based; travel time between schools is necessary.
- IMIs are not required to hold an Ontario Teaching Certificate. As a result, a significant amount of human and financial resources are used to provide training in pedagogically sound instructional practices and PL related to key TDSB commitments each year.
- The professional learning provided to IMIs on PA Days incurs an annual cost of \$198,400.
- On average there are 15 new IMIs hired each year. New hires participate in a Mentoring program. They shadow experienced IMIs and experienced IMIs accompany them to their first few classes. Each new hire is allocated the equivalent of 10 days for this Mentoring Program at an annual cost of approximately \$55,800.
- Data from the TDSB Partnerships Office indicates that currently, 66 organizations have music-based educational partnerships with the TDSB, to provide programming during instructional time - in-person and virtually. Staff will strive to increase the number of music focused partnerships.
- The TDSB has a viable transition plan in place to allow for the continuation of culturally responsive and relevant programming in music. Details of the transition plan are noted in Table 2 of the report.

Appendix C – 1:1 Device Proposal

The 1:1 Student Device Program provides the opportunity for students in Grades 5 through 12 to receive a device (Chromebook) by opting into the program agreement. The goal of the program is to support learning through technology, digital citizenship and TDSB's commitment to equity of access to technology.

The current program is implemented by providing a Chromebook to a student who opts in to the program in Grade 5, collecting the device in Grade 8 and providing another device in Grade 9 that is collected in Grade 12. The annual cost is approximately \$9.7 million to provide the two grades with Chromebooks on an annual basis.

This is the fourth year of implementation and therefore, currently, all students in Grades 5 through 12 have access to a Chromebook.

Funding for the program is an annual challenge as funds from the Ministry for student technology equal \$1.7 million, leading to a shortfall of \$8 million.

Recommendation

Moving forward, it is recommended that the entry point for the 1:1 student devices move from Grade 5 to Grade 7 and that only one device is provided to a student for this period.

This will result in annual savings of approximately \$4.5 million.

Access to Devices

Currently, there are approximately 230,914 Chromebooks in the system. This is a combination of 1:1 student devices, devices supporting students with special education needs and devices purchased by schools.

Devices will be collected from students leaving Grades 8 and 12 in June of 2025. These devices will be collected from schools and assessed for functionality. Those in good working order will be allocated to schools to support access to technology.

Staff will work to ensure that schools have equitable access to devices to support programming at schools, especially in elementary schools.

Phase In of Change

The implementation will be phased in:

1. In 2025-26, students entering Grade 9 will be provided with an opportunity to opt in to the 1:1 student device program. Students entering Grade 5 will not receive this opportunity.
2. In 2025-26, students entering Grade 6 will keep the device currently assigned to them from Grade 5.
3. In 2026-27, students entering Grade 7 will keep the device currently assigned to them and students entering Grade 5 will not be provided an opportunity to opt in. Therefore, in 2026-27, students in Grades 5 and 6 will no longer be part of the program.
4. In 2027-28, students entering Grade 7 will be provided with an opportunity to opt in to the 1:1 student device program. These devices will stay with them until they graduate from Grade 12.

Appendix D - Continuing Education Proposal

During the 2024-25 school year, a number of cost-saving measures were implemented to reduce the deficit in Continuing Education. These included operational efficiencies in the International Languages Elementary-African Heritage (ILE-AH) program, General Interest/Seniors' Daytime programs, and Adult High Schools. These changes, as well as an increase in the Average Daily Enrolment (ADE) in Adult High Schools, have led to a reduction in the deficit of \$2 million.

Over the course of the current school year, additional efficiencies have been explored for the 2025-26 school year.

General Interest/Seniors' Daytime Programs

There are no permanent staffing reductions to the General Interest/Seniors' Daytime programs for 2025-26. However, as reported to the Program and School Services Committee in January 2025, savings are anticipated as user fees will be increased for Fall 2025 so that courses are delivered at cost-neutrality. This will result in savings of \$500,000.

Total Savings - General Interest/Seniors' Daytime	\$500,000
---	-----------

Adult ESL

The reporting line for Adult ESL will be changed from the Continuing Education department to the Community Services department, effective September 1, 2025. Community Services administers the Language Instruction for New Canadians (LINC) program.

There are no staffing reductions proposed for Adult ESL for 2025-26. Over time, it is anticipated that efficiencies and harmonization of processes will be found, including consolidation of sites.

In light of this restructuring, the Continuing Education department's administrative costs have also been reviewed.

Continuing Education Central Administration

As a result of restructuring, including changing the reporting line of the Adult ESL program to the Community Services department, staffing efficiencies have been realized. Other staffing reductions have been made due to the decline in enrolment in General Interest/Seniors' Daytime programs and improved efficiencies in marketing and promotional strategies.

The following chart summarizes permanent reductions in staffing levels that will result in further cost savings for the 2025-26 school year. These reductions will be achieved through attrition.

Position	FTE Reduction	Cost Savings
Marketing Specialist	1.0	\$139,400
Office Clerical - Reception	1.0	\$70,000
Total Central Administration	2.0	\$209,400

International Languages Elementary-African Heritage (ILE-AH) Programs

The Ministry of Education mandates that school boards offer ILE programs to students when sufficient enrolment is generated. TDSB Policy P019 Continuing Education also states that the Board will provide unfunded programs for elementary students to give them a more thorough understanding and appreciation of Black history and culture. However, TDSB's ILE-AH salary and benefit costs exceed funding levels.

For the 2024-25 school year, a reduction of one permanent Program Officer position was made. Staff also revised the process for opening a new class by requiring a minimum enrolment of 25 students and implemented a more rigorous monitoring of attendance in each class to respond to increases or decreases in student enrolment.

Staff continue to explore program delivery models that include migrating courses to evenings and weekends where possible, creating community hubs through larger sites to maximize enrolment per instructor, utilizing both elementary and secondary school sites so that designated sites have the capacity to grow with program demand, and aligning sites with community presence so that existing relationships and structures will continue to thrive. Through some reorganization of program delivery, it is anticipated that there will be \$50,000 in savings for the coming school year.

Through attrition, two Program Officer positions will be reduced for 2025-26. As well, there are currently three itinerant Area Principal positions which will be eliminated with the implementation of a new supervisory structure in 2025-26.

The following chart summarizes additional cost savings for the 2025-2026 school year.

Position	FTE Reduction	Cost Savings
Program Officer	2.0	\$226,000
Area Principals (sessional assignment)	3.0	\$24,000
Additional Savings through Program Reorganization		\$60,000
Anticipated Cost Savings Total - ILE-AH		\$310,000

Learning Outside the School Day (LOSD) (Literacy and Math programming)

In 2024-25, an increase in participation in Learning Outside the School Day has resulted in additional revenue for Continuing Education. Participation in this program is expected to continue to grow.

Anticipated Revenue Surplus Total - LOSD	\$430,000
--	-----------

Night School/Summer School Credit Remote and e-Learning Programs

Increased enrolment and cost efficiencies including improved class sizes and revisions to the summer staffing structure are expected to generate a funding surplus.

Anticipated Revenue Surplus	\$850,000
-----------------------------	-----------

Adult High Schools

TDSB operates five Adult High Schools (Burnhamthorpe Adult Learning Centre, City Adult Learning Centre, Emery Adult Learning Centre, Yorkdale Adult Learning Centre, and Scarborough Centre for Alternative Studies). In addition, each Adult Learning Centre houses an EdVance program for students aged 18 to 20. The unique nature of Adult High Schools is characterized by four intake periods and funding is based on student hours of attendance. For the 2024-2025 school year, changes to Adult High Schools included a reduction in 6.5 permanent staff positions, for a total savings of \$500,000. As well, a review was conducted to identify best practices related to registration, assessment, and timetabling. As a result, changes to these practices at the Adult High Schools have led to savings of \$200,000.

Average Daily Enrolment (ADE) at Adult High Schools has declined by 18% since 2009. However, over the past two years, ADE has continued to climb, resulting in a stronger budgetary position. For the current year, Adult High Schools are on track to achieve a 23% increase in ADE over the previous year.

No further reductions are proposed for 2025-26. However, staff will explore the potential consolidation of sites. This would result in permanent staff reductions to the administrative roles (principal, vice principal, clerical, caretaking, etc.) as well as school operation costs.

The total savings and increases in revenue have a projected positive impact on the 2025-26 budget **of \$2.3 million.**

Appendix E

Total of Proposed Options to Balance

Pools and Swim Programming	12,800,000
Renewed Music Programming	4,000,000
1:1 Devices	4,500,000
Outdoor Education	4,700,000
Continuing Education	2,300,000
Alignment of Class Size to Collective Agreements and Regulations	7,500,000
Reduction of Positions Originally Funded by Eliminated One-Time Funding	10,300,000
New Procedures and Improved Support for Employees	5,000,000
Commitment to Nurturing Local Schools	600,000
Central Budgets	7,500,000
	59,200,000
